CARVER CLAMPS

T-SLOT CLAMPS

The Carver T-Slot Clamp is a popular solution for drilling, grinding, machining and planing applications. The secure holding power and unique design of the T-Slot offers a quicker and safer solution than using packers and bolts, eliminating any loose pieces in the working space.

The T-Slot is highly flexible and can be used at any angle, with the head creating a 'push' action when reversed.

With a height capacity of 0 - 1500mm (60") the T-Slot is available in standard and heavy duty applications, as well as with a choice of standard and long reach variations.

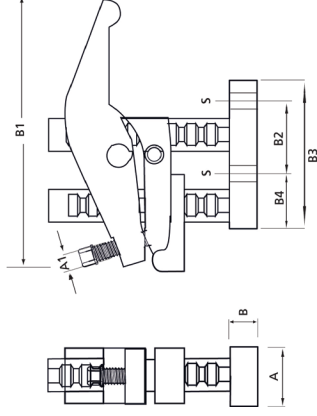

T-SLOT CLAMPS

HOLDS WORK SECURELY ON MANY MACHINES INCLUDING:

- ◆ Horizontal and vertical boring machines
- ◆ Planers
- ◆ Millers
- ◆ Lathes
- ◆ Power Presses
- ◆ Radial Drills
